---

**Frontend:** HTML, CSS, Bootstrap, JavaScript, React.js

**Backend:** Python, Express, Node.js

**Databases:** SQLite

**Other skills:** Blockchain, Express(node), Flexbox, Git, MongoDB, Next.js, OOPs

## PROJECTS

---

### E Commerce Website ([sainxcart.ccbp.tech](http://sainxcart.ccbp.tech))

A responsive website that lets you browse through an extensive range of products with ease.

- Built with a mobile-first approach, this website features HTML structure elements and Bootstrap components to ensure seamless navigation.
- Get a clear view of the products with product videos and a carousel displaying multiple images of offers.

**Technologies used:** HTML, CSS, Bootstrap

### Jobby App ([saikumarjobby.ccbp.tech](http://saikumarjobby.ccbp.tech))

Implemented Jobby App where users can log in and can see a list of jobs with search by Job title, filters based on Salary range and Employment type, etc

- Implemented different pages like Login, Home, Jobs, Job item details using React components, props, state, lists, event handlers, form inputs.
- Authenticating by taking username, password and doing login post HTTP API Call.
- Persisted user login state by keeping jwt token in client storage, Sending it in headers of further API calls to authorize the user.
- Implemented different routes for Login, Home, Jobs, Job item details pages by using React Router components Route, Switch, Link.
- Implemented filters and search text by sending them as query parameters to jobs API calls.
- Redirecting to the login page if the user tries to open Home, Jobs, Job item details routes which need authentication by implementing protected Route.

**Technologies used:** React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

### Nxt Watch ([saikwatch.ccbp.tech](http://saikwatch.ccbp.tech))

Created the Nxt Watch app, a YouTube alternative allowing users to log in, browse video categories such as Trending and Gaming, view saved videos, and search for specific content with a customizable theme.

- Designed interactive pages, including Login, Home, Trending, Gaming, and Saved videos, using React components, state management, and lists.
- Implemented a secure login system with username/password input, followed by API calls and JWT token handling for persistent login states.
- Utilised React Router components (Route, Switch, Link) to establish distinct routes for various pages, enforcing authentication through protected routes.

**Technologies used:** React JS, JavaScript, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication.

### **Keep Notes (<https://keep-backend-smoky.vercel.app/>)**

Developed a fully functional Google Keep clone web application using HTML, CSS, and JavaScript for the front end and MySQL, and NodeJS for the backend. The application allows users to create, manage, and organize notes efficiently, offering a seamless user experience similar to Google Keep.

- Implemented user authentication for secure login and registration, ensuring user-specific data privacy.
- Provided note management features such as creating, editing, deleting notes, adding multiple tags, and managing labels through the sidebar.
- Included a search functionality to quickly find notes and a background color toggle for customizing note backgrounds.
- Supported archived and trashed notes, with options for permanent deletion.
- Ensured a responsive design for a user-friendly interface across various devices.
- Utilized local storage to enhance data privacy by making notes user-specific and not visible after logout.

**Technologies used:** HTML, CSS, Bootstrap, React.js, Node.js, MySQL

## **CERTIFICATES**

---

### **Certificate in Communication Skills and Soft Skills by National Institute for Micro Small and Medium Enterprises (ni-msme)**

Successfully completed a comprehensive training program focusing on effective communication, interpersonal skills, and professional soft skills development.
