SKILLS

Frontend: HTML, CSS, Bootstrap, JavaScript, React.js

Backend: Python, Express, Node.js

Databases: SQLite

Other skills: Express(node), Git, MongoDB, Next.js, OOPs

PROJECTS

E Commerce Website (sainxcart.ccbp.tech)

A fully responsive website that offers a wide range of products, detailed information about each product, and much more.

- Designed to provide the best user experience with HTML structure elements and Bootstrap components.
- Implemented product videos and a carousel to display multiple images of offers, giving customers a clear view of the products.

Technologies used: HTML, CSS, Bootstrap

Jobby App (saikumarjobby.ccbp.tech)

Developed a comprehensive job search solution, Jobby App.

- Designed pages for Login, Home, Jobs, and Job item details with React components and form inputs.
- Secured user data with JWT tokens, REST API calls, and local storage.
- Implemented protected routes and persisted login state with React Router and local storage.

Technologies used: React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

Nxt Watch (saikwatch.ccbp.tech)

Created the Nxt Watch app, a YouTube alternative allowing users to log in, browse video categories such as Trending and Gaming, view saved videos, and search for specific content with a customizable theme.

- Designed interactive pages, including Login, Home, Trending, Gaming, and Saved videos, using React components, state management, and lists.
- Implemented a secure login system with username/password input, followed by API calls and JWT token handling for persistent login states.
- Utilised React Router components (Route, Switch, Link) to establish distinct routes for various pages, enforcing authentication through protected routes.

Technologies used: React JS, JavaScript, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication.

Keep Notes (<https://keep-backend-smoky.vercel.app/>)

Developed a fully functional Google Keep clone web application using HTML, CSS, and JavaScript for the front end and MySQL, and NodeJS for the backend. The application allows users to create, manage, and organize notes efficiently, offering a seamless user experience similar to Google Keep.

- Implemented user authentication for secure login and registration, ensuring user-specific data privacy.
- Provided note management features such as creating, editing, deleting notes, adding multiple tags, and managing labels through the sidebar.
- Included a search functionality to quickly find notes and a background color toggle for customizing note backgrounds.
- Supported archived and trashed notes, with options for permanent deletion.
- Ensured a responsive design for a user-friendly interface across various devices.
- Utilized local storage to enhance data privacy by making notes user-specific and not visible after logout.

Technologies used: HTML, CSS, JavaScript, Node.js, MySQL

CERTIFICATES

Certificate in Communication Skills and Soft Skills by National Institute for Micro Small and Medium Enterprises (ni-msme)

Successfully completed a comprehensive training program focusing on effective communication, interpersonal skills, and professional soft skills development.
